

MAXIMIZING EFFICIENCY AND MODULARITY

# PS140

Your Intelligent, High-Volume  
Folder/Inserter Solution

**HASLER**  
*America's better choice.®*

## TRUE MODULARITY TO HANDLE ALL YOUR MAILING JOBS

The efficient modular design of the PS140 makes it a highly efficient folder/insertion solution, supporting the widest range of mailing applications and always creating professional, high-quality mail pieces. It adapts to promotional and direct marketing campaigns, invoices, monthly statements and so much more... virtually all of your company's current and future mailing needs. The PS140 can do it all – from multiple documents to glossy or coated paper stock to business reply envelopes and ¼" thick booklets.

## HIGH-SPEED EFFICIENCY THAT MAKES A DIFFERENCE

Downtime between jobs is a thing of the past. The PS140's high-capacity feeding and throughput gives you the practical speed to meet your most challenging high-volume production needs. With the unlimited job storage capacity of its powerful programming and control PC-based user interface, there's no limit to the number of application variations you can recall and switch to. Select any of your pre-programmed jobs and the system automatically calibrates itself and is ready in minutes for another run.

## THE ABILITY TO MAXIMIZE AND SIMPLIFY

The highly productive PS140 makes it a breeze for any operator to complete the job setup process. Easy-to-load trays and an intuitive paper

path help the operator quickly master the system. All feeders are reloadable on the fly, with no need to stop the system.

## TRUE APPLICATION FLEXIBILITY

Using up to seventeen high-capacity feeders, the modular design of the PS140 supports most applications while handling as many as fourteen inserts. It supports a document packet thickness up to 6mm and offers a walk-up daily mail function for folding and inserting stapled sets. Whether your application requires a top, middle or bottom address, the PS140 can do it all. Extra fast collation brings documents to the folder/insertion closer to its rated processing speed and ensures the most professional look of nested folded documents.

## FULL PROCESS CONTROL AND EASY ACCESS

The PS140's intelligent PC driven user interface provides the visibility and valuable information you need to know about your jobs. It offers extensive application programming and control of all aspects of the machine, as well as greater access to production data and reports. This includes a complete real-time status of the applications being run and allows the operator to access detailed statistics.

## MAILING SECURITY AND INTEGRITY

With its ability to match each document to a specific insert based on unique customer or account barcode, the PS140 validates the content of each envelope being filled. Optional integrity checking software ensures 100% accurate mail handling, delivering a proof of processing by reconciling your mailing document printstream database with inserted documents and also providing reports for a complete audit trail.

## STREAMLINED FOR SPEED, SIMPLICITY AND ACCURACY

The PS140 is designed to operate at the highest practical speed and efficiency in order to streamline your entire mailing process – from input, to throughput, to output.

### Input

When used in cascading mode, up to 750 documents can be fed through the high-capacity document feeders in one run. When one feeder empties, another automatically engages and continues feeding documents nonstop. The high-capacity insert and envelope feeders can be loaded on the fly as well.

### Throughput

If your mail sets contain multiple documents from one stack, sheets are accumulated from a high-speed document feeder. Then, all sets are nested and folded together, creating a professional quality mail piece while keeping production at the highest level. This ensures a constant high-productivity throughput rate, regardless of the number of documents to be inserted.

### Output

The high-capacity envelope conveyor can be placed in-line, or at a 90-degree angle for unattended operation. Envelopes are stacked face up and are easy to remove for further handling.

## AUTOMATE DOCUMENT MANAGEMENT

The optional DCS by Hasler document output management software provides a complete solution to automate your mail management process.

- Automatically add OMR or barcode on your documents, improving the reliability of your document processing.
- Selectively insert advertising material ensuring maximum communication efficiency.
- Simply sort and merge files reducing your cost per recipient.

## MODULARITY THAT FULLY ADAPTS TO YOUR GROWING BUSINESS

The PS140's convenient modular design ensures that your equipment investment is cost-efficient today and into the future. That means peace of mind when considering potentially challenging job requests that lie ahead. As your company grows, simply add the right module (up to 17 feeder stations) at the right time. Also, the PS140 is the perfect solution for transitioning your existing application to a new technology – effortlessly and cost effectively.

## PS140 SPECIFICATIONS

### MACHINE SPECIFICATIONS

- Length x Height x Depth: 130" x 59" x 21"
- Weight: 715 lbs  
(Above based on a four-module configuration)

### MACHINE CONFIGURATIONS

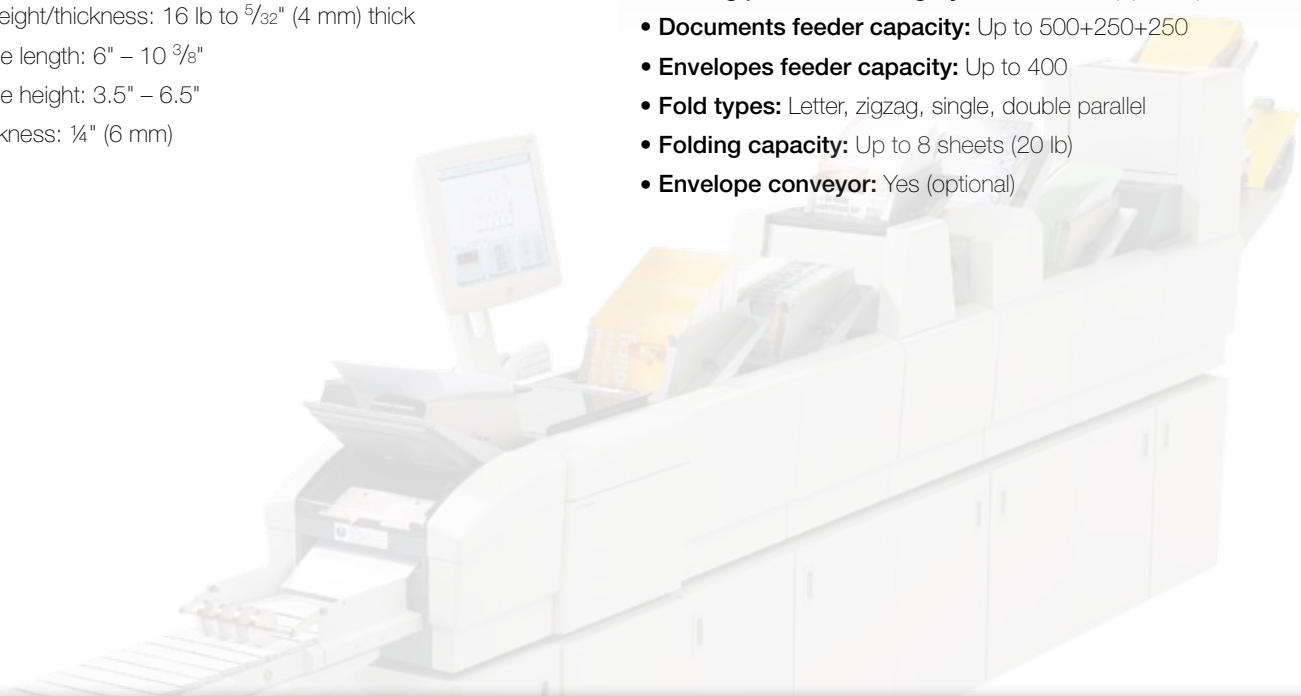

- Full modularity from 1 to 17 feeders
- Mailing machine interface: Optional

### MATERIAL SPECIFICATIONS

- Document height: 5.5" – 16"
- Document width: 5.5" – 9"
- Document weight: 16 – 32 lb
- Insert height: 3" – 6"
- Insert width: 5.5" – 9.5"
- Insert weight/thickness: 16 lb to 5/32" (4 mm) thick
- Envelope length: 6" – 10 3/8"
- Envelope height: 3.5" – 6.5"
- Set thickness: 1/4" (6 mm)

## QUICK FACTS

- Touch screen PC control interface: Yes
- Speed: Up to 4,500/hr
- Automatic job set-up: Yes
- Multiple sheet feeding: Yes
- Cascade from feeders: Yes
- Divert bin for documents: Yes
- Collate before folding: Yes (optional)
- Job memory: No Limitation
- Hand feeding: Yes
- Support for top, middle, bottom address applications: Yes
- Optical Mark Recognition (OMR): Yes (optional)
- Barcode Recognition (BCR): Yes (optional)
- Production run statistics: Yes
- Production job audit trail reports: Yes (optional)
- Mailing production integrity solution: Yes (optional)
- Documents feeder capacity: Up to 500+250+250
- Envelopes feeder capacity: Up to 400
- Fold types: Letter, zigzag, single, double parallel
- Folding capacity: Up to 8 sheets (20 lb)
- Envelope conveyor: Yes (optional)
